

Joseph Coppin

joseph.coppin@gmail.com 📍 Ely, UK

Software Engineer and graduate (1st in Computer Science from University of Warwick) with multiple SWE internships (Stripe, AVEVA, JumpTech) and strong full-stack and systems engineering experience.

SKILLS

Web Development (TypeScript, Svelte, React.js, HTML, CSS, JS) • **Systems Engineering** (Rust, C++, C, x86 Assembly)

DBMS (MySQL, PostgreSQL) • **Cloud** (AWS, Vercel, Supabase)

EXPERIENCE

Stripe

Ruby (Sorbet), Java

Software Engineer **Intern**

Jun – Sep 2025

Enabled customer analytics for Nordic payments by integrating MobilePay and Vipps with the Stripe Sigma, in this 12-week summer internship.

Everywhen

Personal Project

Aug 2021 – Current

SvelteKit, TypeScript, MySQL, Supabase, Tailwind, Playwright, Stripe, TiDB, Brevo

Built Everywhen, an end-to-end encrypted journaling website and PWA, with location-based analytics and powerful integrations. Implemented a custom encrypted batch processing queue and blind indexes, to enable E2EE. 100+ users, 4000+ entries.

Oxynium

Personal Project

Dec 2022 – Dec 2025

Rust, x86-64 Assembly

Designed and implemented the [open-source](#) compiler for my statically typed programming language [Oxynium](#) in Rust, which aims to enable high level abstractions without sacrificing runtime performance. Key features: strong static type system with generics, first-class & lambda functions, macros, classes, operator overloading. Comprehensive test suite and documentation.

AVEVA

Software Engineer **Intern**

Jul – Sep 2024

C#, TypeScript, React.js, Storybook, Microsoft Azure

Modernized legacy code to improve UI responsiveness and reduce technical debt, by rewriting the front end of a customer-facing web app (DataLayer) from .NET Razor to React.js, in this 10-week summer internship in Cambridge.

JumpTech

Software Engineer **Intern**

Aug 2022, Aug – Sep 2023

TypeScript, GraphQL, AWS Lambda, AWS CloudWatch, Storybook, AWS DynamoDB, Jest, Angular, Jira, Jenkins

Enhanced backend stability by resolving bugs in AWS Lambda/DynamoDB and increased code coverage by writing automated Jest tests. After work experience in 2022, returned to this Silicon Fen startup for 6-week internship in 2023.

Que Me Citen

Freelance Web Developer

Aug 2023

Created the portfolio website for the Spanish translation service QueMeCiten.com.

World Cube Association

Volunteer Software Engineer

Aug 2022 – Jan 2023

JavaScript, React, Ruby on Rails

Migrated legacy Ruby on Rails codebase to React, reducing tech-debt and improving UX, while volunteering on the [open-source](#) WCA website.

EDUCATION

- 1st class degree (Computer Science BSc) from University of Warwick (UoW);
 - 3rd year modules: Advanced Databases, Neural Computing, Compiler Design, Principles of Programming Languages, Computer Graphics and Machine Learning;
 - Social secretary of UoW Badminton Club '24-25 - organised weekly social events, and ball for 50+ club members;
 - Team player for UoW Table Tennis Club '24-25, member of UoW Climbing Club Competition Team '25-26;
- A Levels: Achieved A* A* A* A in Computer Science, Physics, Maths and Further Maths respectively;
 - A Level coursework: [open-source](#) house point management web app, used by 41 students and 3 teachers.
